

## Leap of Faith: (Non-picture version) (Loserville Engineering Childrens Collection Book 1)

A fun childrens book that has a good lesson. Fundamental religious like lesson, that tells a child that its okay to be me. This is a Loserville Engineering book (Its not about winning, its about the love of the game.) so you know your child will have good morals to live by. The Author is Catholic, but Christian most of all and likes parts of other religions, hint this Native American masterpiece, that hints at universal love and understanding to something that is different. Its mostly a universal lesson so even if your not spiritual you might enjoy this book and if your a philosopher or just like to think sometimes this might open some thoughts up for even adults. Lets put it this way if you dont like this book you never have to buy another Loserville Engineering book again, its worth a shot.
